

Errata Note

25 April 2024

Re. Correction to “Effects of Preferred versus Nonpreferred Music on Bench Press Performance: A Replication and Extension Study”

An error in the analysis code was noted by the authors on 22 April 2024. The effect size, z-value and p-value for the replication effect changed from Cohen’s $d_z=0.12$, $z=-1.88$, $p=0.036$ to Cohen’s $d_z=-0.12$, $z=2.479$, $p=0.007$, respectively. This did not affect the overall results or interpretation of the study.
